Intellitech

- Supports the latest H.265 video encoding and decoding, achieving 4KP30 ultra high definition video with a bandwidth of 2Mbps, ensuring high-quality video while reducing network construction and operation costs. Simultaneously possessing excellent dual stream collaboration capabilities, supporting dual 4K30+4K30.

- Supports 4 video inputs and 2 video outputs, 7 audio inputs and 5 audio outputs, supports 4K high-definition and H.265 encoding and decoding, with rich interfaces and flexible adaptation to various peripherals, meeting the needs of large and medium-sized conferences and industries.

- Supports two high-definition video outputs, and can be connected to two large screen display devices at the same time. According to the conference scene, two large screen display devices can simultaneously output different images, improving the conference experience.

- Supports real-time live streaming of meetings through RTMP streaming to live streaming platforms, and supports streaming from live streaming platforms to terminal playback. The terminal supports streaming input through the network camera RTSP.

- In addition to supporting remote recording and playback, it also supports USB flash drive recording, plug and play, USB Pass-through and secure and confidential meeting records.
